## EMBEDDED POWER

AC-DC AND DC-DC POWER CONVERSION SOLUTIONS

## Table of Contents

## AC-DC Power Supplies

## Low Power Up to 650 W

10 Open frame/enclosed 1 to 4 outputs
30 External power adapters
Fanless/Conduction Cooled Up to 1000 W
18 LCC250 Series
20 LCC600 Series
22 LCC1200 Series
24 CoolX 600 Series
26 CoolX 1000 Series
28 CS1000 Series
Healthcare Power Up to 24000 W
311 to 24 outputs
Modular Up to 24000 W
36 UltiMod Series
38 Intelligent Medium Power (iMP)
42 Micro Medium Power ( $\mu$ MP)
44 CoolX®1800
46 CoolX®3000
48 Intelligent Medium-High Power (iVS)
52 Precision High Power System (iHP)
56 Intelligent Transfer Switch (iTS)
Bulk Power Up to 12000 W
58 LCM Series
70 Xsolo Series
72 Distributed power bulk front end
Bench Programmable
76 iLS600 Series
78 iLS1500 Series
Distributed and CRPS Power Up to 3000 W
80 DS Series
86 CSU Series
Racks
8850 V, 18 kW, 10 U Open Rack Power Shelf
8950 V, 3 kW, Open Rack Rectifier
9048 V, 30 kW, 2U EIA Power Shelf
9148 V, 3 kW, EIA Rectifier with ATS
DIN Rail (ADN) Up to 960 W
92 Single \& 3-phase

## DC-DC Converters

## Industry Standard Isolated

96 Quarter-Brick
97 Eighth-Brick
99 Sixteenth-Brick
101 Radio Frequency Power Modules
102 Wide Input Voltage
102 Direct Conversion - PSA Series
Industry Standard Non-isolated
103 C-Class
105 POLA Products
107 Digital DC-DC Converters
High Power 300 V Input
108 On-board AC-DC Distributed Architecture
109 Power Factor Correction (PFC)
Low Power Isolated
110 Low Power Isolated DC-DC
117 DC-DC Converter for Railway Application
119 DC-DC Converter for Medical Application

High Voltage DC-DC Modules
121 Mission-Critical High Voltage Solutions

## Advanced Energy shapes and transforms how power is used, delivered, and managed.

Advanced Energy has devoted more than four decades to perfecting power for its global customers. We design and manufacture highly engineered, precision power conversion, measurement, and control solutions for mission-critical applications and processes.

Advanced Energy offers a broad portfolio of AC-DC and DC-DC power supplies from its Artesyn, Excelsys, and UltraVolt product lines which enables customer innovation in complex applications for a wide range of industries including semiconductor equipment, industrial, manufacturing, telecommunications, data center computing, and medical. With deep application know-how and responsive service and support across the globe, we build collaborative partnerships to meet rapid technological developments, propel growth for our customers, and innovate the future of power.

## Local Support

Our regional sales offices are ready to provide expert local applications and sales support. In addition, an extensive network of manufacturers' representatives and distributors bring our products to you. Please call for sales office locations near you or visit our website at advancedenergy.com.

1/16th brick 35 to 120 W; ALD/AVD 1/8th brick 50 to 300 W; AVO/ADO $1 / 4$ brick 50 to 800 W; AVQ/ADQ $1 / 2$ brick 300 to 700 W; AVE/ADH Full brick 500 to 800 W; AGF

## HIGH VOLTAGE

High Power C
Output voltage 125 V to 60 kV
Output power
60,125 , or 250 W

A
Output voltage
62 V to 40 kV
Output power
$4,15,20$, and 30 W

## LE

Output voltage 1 to 30 kV
Output power 4,20 , and 30 W

## AA

Output voltage 62 V to 6 kV
Output power 4,20 , and 30 W

## HVA

Output voltage 1 to 20 kV
Max output power

US
Output voltage 200 to 500 V Max output power 0.1 W

## A History of Innovation

At Advanced Energy, our engineers have been designing and developing power supply products for more than 40 years. Our products have helped pave the way for advancements in numerous applications in the communications, industrial, computing, data storage, and healthcare markets.

When developing products, time is money. Every step in the process that you can eliminate, speed up, or make more effective accelerates your time-to-market and lowers your R\&D costs.

Major advantages of partnering with us include:

- Broad portfolio of power supplies
- Highly versatile power supplies
- Modified standards and value-add services
- Low energy consumption
- Energy-efficient products
- Space-efficient power
- Reliability and quality
- Worldwide distributor network

■ Vast knowledge, experience, and expertise

# Advanced Energy utilizes the following design methodologies and techniques to ensure that our power supplies meet the rigorous quality and reliability requirements of the communications, industrial, computing, data storage, and healthcare markets. 

## Power for the Next Generation

Many of our products incorporate powerful programming, monitoring, and self-testing software providing system engineers with critical data to manage power consumption. High efficiency, green design and manufacturing technologies, and innovative supply and demand systems collectively deliver key business efficiencies and new design capabilities.

Advanced Energy can help take your new product design or redevelopment efforts to the next level with a shorter time-to-market, higher reliability, and greater scalability.

- Shorter Time-to-Market - our latest programmable power solutions and our modular, medium/high power $\mu \mathrm{MP}$ and iMP series provide you with shorter time-to-market and offer faster test and qualification than traditional analog power solutions. Our modified standards and value-add services also provide turn-key solutions for the best application match to help accelerate time-to-market without compromising quality.
- Higher Reliability - moving from inflexible fixedoutput analog power supplies to programmable power solutions enables our engineers to more extensively test and document our products to ensure they meet or exceed your reliability requirements. We also provide a wide range of environmental, EMC compliance, and safety certifications to help speed your product design process.
- Greater Scalability - many of our latest power solutions are scalable, programmable, and plugcompatible with our earlier-generation products, enabling you to quickly address changes or enhancements to your systems. You can now satisfy most changes in power requirements by reprogramming the power supply and, if you needs change radically, you can easily swap to a more capable solution. This inherent scalability eliminates redesign costs, reduces testing time, and provides you with greater design flexibility.

## Power Supply Design Controls

## Reliability Models and Predictions

- A prediction of design reliability in terms of Mean Time Between Failures (MTBF) using Telecordia, Bellcore, or MIL-HDBK-217F
- Not intended as a measure of expected field performance, but for design trade-off analysis and review of part stress derating performance

Failure Modes and Effect Analysis

- An analytical technique to identify and review failure modes, their causes, mechanisms, and effects
- Provides a formal risk assessment to reduce field failures at the customer site

## Component Selection

- Database warehouse of all component information
- Design engineers can only select components rigorously approved from suppliers that have undergone strict qualification and auditing process

## Derating Analysis

- Intended to reduce the failure rate of components

Design for Manufacturability

- Design rules regarding manufacturability

## Simulation Analysis - Computer-aided

Engineering Tools

- Thermal Simulation
- Circuit Simulation
- EMI Field Simulation
- Detailed Mechanical Design
- PCB Layout and Tracking
- Structural Simulation

## Advanced Energy Computer-aided Engineering Tools

## $\Delta$ <br> AC-DC Power Supplies

As an industry leader in distributed power supplies, Advanced Energy provides an exceptionally wide range of AC-DC power conversion solutions

## LOW POWER

## Low Power

## Open Frame 1 to 4 Outputs

20 to 650 W

## SPECIAL FEATURES

## All models feature

- Industry standard footprints
- Wide-range AC input
- Full power to $50^{\circ} \mathrm{C}$
- High demonstrated MTBF
- Over-voltage protection
- Over-load protection

## Many models feature

- EN61000-3-2 compliance
- Supervisory outputs ( $5 \mathrm{~V} / 12 \mathrm{~V}$ )
- Wide-adjust floating $4^{\text {th }}$ output
- Single wire current share
- Medical approvals
- Remote sense
- Adjustable outputs
- Power fail
- Wide-adjust on single output models
- Derated operation to $80^{\circ} \mathrm{C}$

## CPS250-M

Open Frame 250 W AC-DC Power Supply

## SPECIAL FEATURES

- Up to 250 W forced air, 155 W natural convection

■ 2" $\times 4$ " $\times 1.29$ " open frame package

- Class I and II operation
- < 500 mW No-load power consumption
- $+10 \%$ output adjustment
- 12 V fan output
- Over-voltage, over-current, and over-temperature protection
- Start-up at $-40^{\circ} \mathrm{C}$ ambient temperature
- Medical and ITE safety approvals
- 2X MOPP, type BF ready
- High efficiency: 93\% typical
- > 2.2 MHrs MTBF
- 3-year warranty
- LPX100 enclosure kit available

[^1]Convection/Conduction Mounting 250 W

SPECIAL FEATURES

- Wide operating temperature range suited for both outdoor and indoor applications
- 250 W fanless power supply with zero derating up to $85^{\circ} \mathrm{C}$ baseplate
- IP64 rated enclosure
- Conduction or convection mounting
- Differential remote sense
- Output adjust
- Output on/off (Positive or negative logic user selectable)

Total Power

250 W
\# of Outputs
Single
Output
$12 \mathrm{~V}, 24 \mathrm{~V}, 48 \mathrm{~V}$
Size
4" x 7" x 1.1"
Compliance

- EMI Class B
- EN61000 Immunity

Safety

- UL + CSA 60950-1
- TÜV 62368-1 / 60601-1 /

61347-1; 2-13

- China CCC $^{1}$
- CB Scheme IEC 62368-1 / IEC 61347-1; 2-13 / IEC 60601-1

1 China CCC approval applies to part numbers with "-xxE" suffixes only.

1 Output ripple measured at the end of the output cable terminated with $10 \mu \mathrm{~F}$ tantalum capacitor in parallel with $0.1 \mu \mathrm{~F}$ ceramic capacitor.
2 Additional external capacitance required to meet the indicated Output Ripple Limits. Please check the Technical Reference Notes.
3 China CCC approval applies to part numbers with "-xxE" suffixes only.
412 V output compliance to CE102 requires external filter. Consult Technical Reference Notes.

LCC600
Convection/Conduction Mounting 600 W

SPECIAL FEATURES

- Baseplate cooled ■ With +5 V standby @ 1.5 A
- -40 to $85^{\circ} \mathrm{C}$ operating baseplate temperature
- No derating up to $85^{\circ} \mathrm{C}$ baseplate temperature
- Adjustable output
- 10.6 W per in ${ }^{3}$
- Differential remote sense
- Full DSP controlled
- Optional IP65 ("-4P" suffix) variant
- Optional 277 VAC Nominal input ("H" suffix) variant
- Active Ishare
- PMBus ${ }^{\text {TM }}$
- Industrial/Medical safety (Suited for
- EMI Class B BF Type applications)

1 Change suffix "-9P" to "-4P" for IP65 rated enclosure with fly lead wires.
Change suffix "-4P" to "-4PR" for IP65 rated enclosure with right angle fly lead wires (applies to $28 \mathrm{~V}, 36 \mathrm{~V}, 48 \mathrm{~V}$ ). Change suffix " 4 P " to " 4 PV " for cables without control signal (applies to $28 \mathrm{~V}, 36 \mathrm{~V}$ and 48 V ).
2 Typical Efficiency at high line, factory default voltage and full load.
3 When the output voltage is set as low as 24 V , it can provide a current of up to 25 A (the maximum power is 600 W ) At the default output voltage of 28 V , the output current is up to 21.43 A (the maximum power is 600 W ).

## LCC1200 <br> Convection/Conduction Mounting 1200 W

## SPECIAL FEATURES

- 1200 W full power at elevated temperatures
- Wide operating temperature range (-40 to $85^{\circ} \mathrm{C}$ baseplate)
- Adjustable output
- Remote output On/Off
- AC_OK; DC_OK signals
- 5 V standby voltage
- Active current share
- Conduction-cooled/fanless
- $I^{2} \mathrm{C} /$ PMBus
- ITE Safety
- Active power factor correction

## Total Power:

## 1200 W

## CoolX ${ }^{\circ} 600$ Series

Fanless, Natural Convection-Cooled Modular Power Supply

## SPECIAL FEATURES

## No Fan Featured

- 600 W with $100 \%$ natural convection cooling
- No base plate needed
- No acoustic noise or vibrations

## Reliability

- MTBF > 400,000 hours, $25 \%$ better than today's leading solutions
- High input surge protection 4 kV line to PE for harsh environments
- Reverse energy protection - No blocking diodes required
- 24 W always ON auxiliary power output

## TYPICAL APPLICATIONS

## Medical

- Clinical diagnostic equipment, medical lasers, dialysis equipment, radiological imaging, clinical chemistry

## Industrial

- Test and measurement, industrial machines, automation equipment, printing, telecommunications, audio equipment
- Safety approved to 5000 m altitude
- > 94\% efficiency
- Five-year warranty

## Flexibility

- Analog and digital management - PMBus ${ }^{T M}$ monitoring and control capability
- Field-configurable - plug and play power
- Series and parallel outputs - higher voltages/currents
- Mounting options - base/side and DIN-Rail mounting

Hi Rel

- Harsh industrial electronics, radar (navaland ground-based), communications, test and measurement

Certification and Compliance

## Medical

- IEC60601-1 3rd edition, IEC60601-1-2 4th edition (EMC)
- 2 MOPP
- Dual fused

## Industrial

- IEC60950, IEC62368-1
- SEMI F47 ${ }^{1}$

## Defense/Aero

- MIL-STD-810G

1. SEMI F47 compliant at input voltages $>180$ VAC. Consult Advanced Energy for details.

## CoolX 1000 Series

## Fanless, Intelligent 1000 W Modular Power Supplies

## SPECIAL FEATURES

## No Fan Featured

- 1000 W with $100 \%$ natural convection cooling
- No base plate needed
- No acoustic noise or vibrations

## Reliability

- MTBF > 2,900,000 hours
- High input surge protection 4 kV line to PE for harsh environments
- Reverse energy protection - No blocking diodes required
- 24 W standby power
- Safety approved to 5000 m altitude
- 93\% efficiency
- Five-year warranty

## Flexibility

- Analog and digital management - PMBus ${ }^{T M}$ monitoring and control capability
- Field-configurable - plug and play power
- Series and parallel outputs - higher voltages/currents
- Mounting options - base/side and DIN-Rail mounting

## TYPICAL APPLICATIONS

## Medical

- Clinical diagnostic equipment, medical lasers, dialysis equipment, radiological imaging, clinical chemistry

## Industrial

- Test and measurement, industrial machines, automation equipment, printing, telecommunications, audio equipment

## Hi Rel

■ Harsh industrial electronics, radar (navaland ground-based), communications, test and measurement

## Environmental Specifications

| Operating Temperature | Operates to specification below $-20^{\circ} \mathrm{C}$ after 10 min <br> warm-up, -40 to $85^{\circ} \mathrm{C}$ |

## CS1000 Series

## Fanless, 1U, High Efficiency 1000 W Single Output Power Supplies

## Total Power

- CS10S 1000 W
- CS10M 1000 W

Output Voltage

## 24 V, 48 V

## Safety

Medical
■ IEC60601-1 3rd edition

- 2 MOPP
- Dual fused

## Industrial

- IEC62368-1
- ISO9001:2015
- SEMI F47 ${ }^{1}$

1. SEMI F47 compliant at input voltages $>180$ VAC. Consult Advanced Energy for details.

## SPECIAL FEATURES

## No Fan Featured

- 1000 W with $100 \%$ natural convection cooling
- No base plate needed
- No acoustic noise or vibrations

## Reliability

■ High input surge protection -4 kV line to PE for harsh environments

- Reverse energy protection - No blocking diodes required
- User selectable (5 V / 12 V ) 24 W always ON auxiliary power output
- N+1 Redundancy Ready

## TYPICAL APPLICATIONS

## Medical

- Clinical diagnostic equipment, medical lasers, dialysis equipment, radiological imaging, clinical chemistry

## Industrial

- Test and measurement, industrial machines, automation equipment, printing, telecommunications, audio equipment
- Can be paralleled for higher power
- Optional low leakage (<150 uA)
- Safety approved to 5000 m altitude
- Programmable start-up state (Default ON or Default OFF)
- > 94\% efficiency
- Five-year warranty

## Flexibility

- Analog and digital management - PMBus ${ }^{\text {TM }}$ monitoring and control capability
- Mounting options: base/side and DIN-Rail mounting

Hi Rel

- Harsh industrial electronics, radar (navaland ground-based), communications, test and measurement

## LOW POWER

## Low Power

## External Power Adapters

## 10 to 100 W

## SPECIAL FEATURES

## All Models Feature

- Wide-range AC input
- High demonstrated MTBF
- Over-load protection
- Extensive safety approvals

## Many Models Feature

- EN61000-3-2 compliance
- Medical approvals
- Thermal protection
- Energy Star/ErP
- DoE Level VI
- EU CoC v5 Tier 2

AC Input

- Wallmount
- U.S. - 2-prong
- China - 2-prong
- Europe - 2-prong
- United Kingdom - 3-prong
- Australia - 2-prong
- Korea - 2-prong
- Japan - 2-prong
- Interchangeable
- Freestanding
- IEC320 3-pin (C14) \& (C6)

DC Output

- Single output
- 2.5 mm barrel plug

[^4]
## Healthcare AC-DC Power Supplies

## Up to 24,000 W

Advanced Energy produces a wide range of AC-DC power supplies certified for use in medical equipment requiring lower safety ground leakage and higher isolation. The power supplies listed below are designed for use in Non-patient critical applications: bio-life science, medical, dental, imaging and laboratory applications such as immunoassay and in-vitro diagnostics machines, ultrasound, and mass analyzers. All of these power supplies are high efficiency switch-mode designs and feature medical safety approval to EN60601-1.

## SPECIALFEATURES

## All Models Feature

- Industry standard footprints
- Full power to $50^{\circ} \mathrm{C}$
- Medical approvals
- Wide-range AC input
- Remote sense
- Adjustable outputs
- Power fail
- High demonstrated MTBF
- Over-voltage protection
- Over-load protection
- Built-in EMI filtering

## Many Models Feature

- EN61000-3-2 compliance
- Supervisory outputs ( $5 \mathrm{~V} / 12 \mathrm{~V}$ )
- Wide-adjust floating $4^{\text {th }}$ output
- Single wire current share
- Wide-adjust on single output models
- Voltage monitor/data logging
- Real-time parametric adjustment \& control

UltiMod Series
Unique in Flexibility, Unrivalled in Performance, Ultra-cost Competitive

SPECIAL FEATURES

- Highest efficiency - up to $91 \%$
- User and field configurable
- Standard medical features
- Leakage current < $300 \mu \mathrm{~A}$ (< $150 \mu \mathrm{~A}$ optional)
- 2 MOPP
- 4 KV Isolation
- Lowest acoustic Noise

Total Power

- $-40^{\circ} \mathrm{C}$ start-up temperature
- Extra ruggedized optional
- Vibration: MIL-STD-810G
- No minimum load
- Extra-low profile $<1 \mathrm{U}$ height
- All outputs fully floating
- Series/parallel of multiple outputs
- 5 V isolated standby voltage
- Active PFC (Power Factor Correction)
- Product options: Conformal coating, low leakage current, connector, cabling and mounting options, and reverse fans additional ruggedization

TYPICAL APPLICATIONS
4, 6
Medical

- Clinical diagnostic and dialysis equipment, medical lasers, radiological imaging, clinical chemistry

Industrial

- Test and measurement, industrial machines, automation and audio equipment, printing, telecommunications

## Intelligent MP Series

Intelligent Modular Power Supply for Optimum Flexibility Up to 1500 W

## SPECIAL FEATURES

- Medical EN60601-1 approval
- Intelligent ${ }^{2} \mathrm{C}$ control
- Voltage adjustment on all outputs (Manual or $\mathrm{I}^{2} \mathrm{C}$ )
- Configurable input and output (case and module) OK signals and indicators
- Configurable inhibit/enable
- Configurable output UP/DOWN sequencing
- Configurable current limit (foldback or constant current)
- High power density (8.8 W/in ${ }^{3}$ )
- Intelligent fan (speed control/fault status)
- Downloadable GUI from website
- Customer provided air option
- $\mu \mathrm{P}$ controlled PFC input with active inrush protection
- $I^{2} \mathrm{C}$ monitor of voltage, current and temp
- Programmable voltage, current limit, inhibit/enable through $I^{2} \mathrm{C}$
- Optional extended hold-up module (SEMI F47 compliance)
- CAN BUS and RS-485 interface option
- Low leakage ( $<300 \mu \mathrm{~A}$ )
- Increased power density to 50\% over standard MP
- Backward compatibility with standard MP
- External switching frequency sync input
- Optional conformal coating
- Industrial temp range ( -40 to $70^{\circ} \mathrm{C}$ )
- No preload required
- Industrial shock/vibration (> 50 Gs)

## Up to 21

Increments of current Not shown can be achieved by paralleling modules (add currents of each module selected).

1 Programmable
2 Contact factory for extended range down to 6 V
3 Total output power on dual module must Not exceed 144 W
4 For single output modules only
5 Applicable for iMP1 only

## Total Power

Up to 1800 W
Input Voltage

- 85 to 264 VAC
- 120 to 300 VDC

## \# of Outputs

## Up to 12

## Safety

- UL UL60950/UL60601-1
- CSA CSA22.2 No. 234 Level 5
- VDE EN60950/EN60601-1
- BABT Compliance to EN60950/ EN60601 BS7002
- CB Certificate and report
- CE Mark to LVD
- CCC Approved

## MicroMP Series

Cost-efficient, Configurable Power Supply with Market-leading Density and Efficiency Up to 1800 W with New Product Enhancements

## SPECIAL FEATURES

- Optional conformal coating
- Industrial temp range ( -40 to $70^{\circ} \mathrm{C}$ )
- Industrial shock/vibration (> 50 G's)
- Low cost
- Standard medical leakage ( $<400 \mu \mathrm{~A}$ ) with optional low leakage ( $<100 \mu \mathrm{~A}$ )
- New 1000 W modules
- PMBus ${ }^{\text {TM }}$
- High efficiency
- Low profile 1 U size
- Multi output
- Current limit - constant current foldback (optional)
- Low acoustic noise
- High power density
- uMP04: 10.8 W/in ${ }^{3}$
- uMP09: 18.0 W/in ${ }^{3}$
- uMP10: 15.1 W/in ${ }^{3}$
- uMP16: 22.9 W/in ${ }^{3}$
- Intelligent fan (speed control/fault status)
- Downloadable GUI from website
- $\mu \mathrm{P}$ controlled PFC input with active inrush protection
- No preload required
- IEC, terminal block, or barrier strip input option

| Electrical Specifications Input |  |
| :---: | :---: |
| Input Range | 85 to 264 VAC <br> 120 to 350 VDC (limited to 300 VDC in medical apps) |
| Frequency | 47 to 440 Hz |
| Inrush Current | 40 A peak max (soft start) |
| Efficiency | Up to 91\% @ full case load |
| Power Factor | 0.99 typ meets EN61000-3-2 (n/a @ 440 Hz ) |
| Turn-on Time | AC on 2 sec for $\mu \mathrm{MP10/16}$ and 1.5 sec for $\mu$ MP04, inhibit/enable 250 ms typical |
| EMI Filter | CISPR 22/EN55022 Level "B" |
| Leakage Current | < $200 \mu \mathrm{~A}$ using center-tapped xfmr measurement method. (< $400 \mu \mathrm{~A}$ @ 264 VAC input) |
| Radiated EMI | CISPR 22/EN55022 Level "B" |
| Warranty | Two years |
| Output |  |
| Factory Set Point Accuracy | $\pm 1 \%$ |
| Margining or Optional V Program | $\pm 3-7 \%$ Nominal analog (single output module only) |
| Overall Regulation | $0.4 \%$ or 30 mV which ever is greater |
| Ripple | RMS: $0.1 \%$ or 10 mV , whichever is greater Pk-Pk: $1.0 \%$ or 50 mV , whichever is greater Bandwidth limited to 20 MHz |
| Dynamic Response | < $\pm 5 \%$ or 250 mV , with $50 \%$ step load |
| Recovery Time | To within $1 \%$ in < $300 \mu \mathrm{~s}$ |
| Reverse Voltage Protection | 100\% of rated output current |
| Thermal Protection (OTP) | All outputs disabled when internal temp exceeds safe operating range. |
| Remote Sense | Up to 0.5 V total drop (Not available on triple output module) |
| Single Wire Parallel | Current share to within 5\% of total rated current |
| DC OK | $\pm 5 \%$ of Nominal |
| Minimum Load | Not required; signal is open collector |
| Housekeeping Standby | 5 VDC @ 2.0 A max present whenever AC input is applied |
| Module Inhibit | Logic - output on with low or open. Different logic options available |
| Output/Output Isolation | > 1 Megohm, 500 V |

## Environmental Specifications

| Operating Temperature | -40 to $70^{\circ} \mathrm{C}$ ambient. Derate each output $2.5 \%$ per degree from 50 to $70^{\circ} \mathrm{C} .\left(-20^{\circ} \mathrm{C}\right.$ start-up) Meets full <br> spec after $1 / 2$ load. 10 min warm-up |
| :--- | :--- |
| Storage Temp | -40 to $85^{\circ} \mathrm{C}$ |
| Electromagnetic Susceptibility | Designed to meet EN61000-4; $-3,-6,-11$ Level 3, Level 4 for $-2,-4,-5$ |
| Humidity | Operating; Non-condensing 10 to $95 \%$ RH |
| Vibration | MIL-STD-810E |
| MTBF Demonstrated | $>350,000$ hours at full load, one $\mu M P 04$ case + two modules, Telcordia SR-332 calculated MTBF |
| Altitude: | Up to $10 \mathrm{k} \mathrm{ft;} \mathrm{derate} \mathrm{linear} \mathrm{to} 50 \%$ from 10 to 30 k ft |

CoolX ${ }^{\circledR} 1800$
High Efficiency, Intelligent and Reliable 1800 W Modular Power Supplies

SPECIAL FEATURES
Modular Power Supply

- Up to 1800 W
- Up to 12 outputs
- All outputs isolated (1850 VAC)
- Variable fan speed control

Reliability

- MTBF > 200,000 hours
- Level 4 input surge protection

Total Power

- CX18S 1800 W
- CX18M 1800 W

Slots
6, 6
Cooling
Variable fan speed control
Parameters
$262 \mathrm{~mm} \times 127 \mathrm{~mm} \times 41 \mathrm{~mm}$
(10.5 in $\times 5$ in $\times 1 \mathrm{U}$ )

Certification and Compliance
Medical (CX18M)

- IEC60601-1 3rd edition, IEC60601-1-2 4th edition (EMC)
- 2 MOPP
- Dual fused

Industrial (CX18S)

- IEC60950, IEC62368-1
- SEMI F47 ${ }^{1}$

Defense/Aero (All Models)

- MIL-STD-810G

1 SEMI F47 compliant at input voltages $>180$ VAC. Consult Advanced Energy for details.

Flexibility

- Analog and digital management - PMBus ${ }^{\text {TM }}$ monitoring and control capability
- Field-configurable - plug and play power
- Series and parallel outputs for higher voltages and currents
- Mounting options - base/side and DIN-Rail mounting

TYPICAL APPLICATIONS

Medical

- Clinical diagnostic equipment, medical lasers, dialysis equipment, radiological imaging, clinical chemistry

Industrial

- Test and measurement, industrial machines, automation equipment, printing, telecommunications, MIL-COTS

Audio Equipment

- Hi Rel, harsh industrial electronics, radar (marine- and groundbased), communications, test and measurement

1 Full dynamic specifications may Not be met at full load when output voltage is trimmed above 13 V
2 Max Trim 14 V when used with High Power Module
3 Max Trim 56 V when used with High Power Module
4 a) Only one High Power module (CmE or CmF) can be used per CoolPac
 for details or support..
5 For the CmG module the max combined power of both outputs is 200 W
6 For the CmH module the max combined power of both outputs is 180 W
7 When a CmK module is used in the same pack as a CmE or CmF module, one module slot must remain unpopulated.

## CoolX ${ }^{\circledR} 3000$

## High Efficiency, Intelligent and Reliable 3000 W Modular Power Supply

## Total Power

- CX30S 3000 W
- CX30M 3000 W

## Slots

12, 12

## Cooling

Variable fan speed control

## Parameters

## $325 \times 131 \times 120 \mathrm{~mm}$

$(12.8 \times 5.2 \times 4.7 \mathrm{in})$

## Safety

Medical (CX30M)

- IEC60601-1 3rd edition, IEC60601-1-2 4th edition (EMC)
- 2 MOPP
- Dual fused

Industrial (CX30S)

- IEC62368-1
- SEMI F47

## SPECIAL FEATURES

Modular Power Supply

- Up to 3000 W
- Up to 24 outputs
- All outputs isolated (1850 VAC)
- Variable fan speed control

## Reliability

- MTBF > 150,000 hours
- Level 4 input surge protection
- 23.5 W always ON auxiliary power output
- Safety approved to 5000 m altitude
- $91 \%$ efficiency
- Five-year warranty

## TYPICAL APPLICATIONS

## Medical

- Clinical diagnostic equipment, medical lasers, dialysis equipment, radiological imaging, chemical chemistry

## Industrial

- Test and measurement, industrial machines, automation equipment, printing, telecommunications

Flexibility

- Analog and digital management - PMBus ${ }^{\text {TM }}$ monitoring and control capability
- Field-configurable - plug and play power
- Series and parallel outputs for higher voltages and currents
- Mounting options - base/side

## Hi Rel

- Harsh industrial electronics, radar (marine- and groundbased), communications, test and measurement

## Total Power

## Up to 4920 W

Input Voltage

- 85 to 264 VAC
- 120 to 300 VDC

## \# of Outputs

## Up to 24

## Safety

- UL UL60950/UL2601
- CSA CSA22.2 No. 234 Level 5
- VDE EN60950/EN60601-1
- BABT Compliance to EN60950/ EN60601 BS7002
- CB Certificate and report
- CE Mark to LVD

## Intelligent VS Series

Intelligent Modular Power Supply for Optimum Flexibility Up to 4920 W

## SPECIAL FEATURES

Medical EN60601-1 approval

- Intelligent ${ }^{2} \mathrm{C}$ control
- Voltage adjustment on all outputs (manual or $\mathrm{I}^{2} \mathrm{C}$ )
- Configurable input and output OK signals and indicators
- Configurable inhibit/enable
- Configurable output UP/DOWN sequencing
- High power density (12 W/in ${ }^{3}$ )
- Intelligent fan (speed control/fault status)
- $\mu \mathrm{P}$ controlled PFC input with active Inrush protection
- ${ }^{2} \mathrm{C}$ monitor of voltage, current and temp
- Programmable voltage, current limit, inhibit/enable through $1^{2} \mathrm{C}$
- CAN BUS and RS-485 interface option
- Optional extended hold-up module (SEMI F47 compliance)
- Increased power density to $150 \%$
- Optional conformal coating
- Industrial temp range ( -40 to $70^{\circ} \mathrm{C}$ )
- Uses standard iMP modules
- Field upgradeable firmware
- RoHS compliant

Single

Dual

144 W
Triple

1500 W (10 to 60 V )

36 W

1500 W with Bus Bar Adaptor Option (used with the 10 to 60 V module)

| Electrical Specifications Input |  |
| :---: | :---: |
| Input Range |  |
| iVS1 \& iVS3: | 90 to 264 VAC 1Ф: 120 to 300 VDC |
| iVS6 \& iVS8: | 170 to 264 VAC $3 \varnothing$ |
| iVS8H | 380/480 VAC $3 \varnothing$ |
| Frequency | 47 to 63 Hz |
| Inrush Current | 40 A peak maximum (soft start) |
| Efficiency | Up to 85\% @ full case load |
| Power Factor | 0.99 typ meets EN61000-3-2 |
| Turn-on Time | AC on 1.5 sec typical, inhibit/enable 150 ms typical. Programmable |
| EMI Filter | CISPR 22/EN55022 Level "B" |
| Leakage Current | $300 \mu \mathrm{~A}$ max @ 240 VAC; 47 to 63 Hz |
| Radiated EMI | CISPR 22/EN55022 Level "B" |
| Holdover Storage | 10 ms minimum (independent of input VAC) additional 20 ms holdover storage with optional HUP module (SEMI F47 compatible) |
| AC OK | > 5 ms early warning minutes before outputs lose regulation. Full cycle ride thru ( 50 Hz ). Programmable |
| Harmonic Distortion | Meets EN61000-3-2 |
| Isolation | Meets EN60950 and EN60601 <br> Meets 1 MOPP Primary to ground, 2 MOPP Primary to Secondary ${ }^{1}$ |
| Global Inhibit/Enable | TTL, Logic "1" and Logic "0"/configurable |
| Warranty | Three years |
| Output |  |
| Adjustment Range ${ }^{2}$ | $\pm 10 \%$ minimum all outputs (manual) (full module adjustment range using ${ }^{2} \mathrm{C}$ ) |
| Margining | $\pm 4$ to $6 \%$ Nominal analog (single output module only) |
| Overall Regulation | $0.4 \%$ or 20 mV max ( 1500 W modules 1\% max) |
| Ripple | RMS: $0.1 \%$ or 10 mV , whichever is greater Pk-Pk: $1.0 \%$ or 50 mV , whichever is greater Bandwidth limited to 20 MHz |
| Dynamic Response | <2\% or 100 mV , with $25 \%$ load step |
| Recovery Time | To within $1 \%$ in < $300 \mu$ s |
| Over-current Protection ${ }^{3}$ | Configurable through $I^{2}$ C. single output module and main output of the dual output module 105 to $120 \%$ of rated output current. Aux output of dual output module 105 to $140 \%$ of rated output current. Special programmable OCP delay on 1500 W module from 100 ms to 25.5 seconds with shutdown features |
| Short-circuit Protection | Protected for continuous short-circuit. Recovery is automatic upon removal of short (Shutdown mode on 1500 W module) |
| Over-voltage Protection ${ }^{2}$ | Configurable through ${ }^{2} \mathrm{C}$ |
| - Single Output Module | 2 to 5.5 V 122 to $134 \%$; 6 to 60 V 110 to $120 \%$ |
| - Dual Output Module | 2 to 6 V 122 to $134 \%$; 8 to 28 V 110 to $120 \%$ |
| - Triple Output Module | No over-voltage protection provided |
| Thermal Protection ${ }^{2}$ | Configurable through $1^{2} \mathrm{C}$ <br> All outputs disabled when internal temp exceeds safe operating range. > 5 ms warning (AC OK signal) before shutdown |
| Remote Sense | Up to 0.5 V total drop (Not available on triple output module) |
| Single Wire Parallel | Current share to within $2 \%$ of total rated current |
| DC OK ${ }^{2}$ | $\pm 5 \%$ of Nominal. Configurable through $I^{2} \mathrm{C}$ |
| Minimum Load | Not required |
| Housekeeping Bias Voltage | 5 VDC @ 1.0 A max present whenever AC input is applied |
| Module Inhibit ${ }^{2}$ | Configured and controlled through $1^{2} \mathrm{C}$ |
| Output/Output Isolation | > 1 Megohm, 500 V |

1 iVS8H does Not have Medical or MOPP approvals
2 Can be controlled via $1^{2} \mathrm{C}$
3 Controlled via $I^{2} \mathrm{C}$ but requires load calibration

## INTELLIGENT MEDIUM-HIGH POWER

| Environmental Specifications | -40 to $70^{\circ} \mathrm{C}$ ambient. Derate each output $2.5 \%$ per degree from 50 to $70^{\circ} \mathrm{C} .\left(-20^{\circ} \mathrm{C}\right.$ start-up) |
| :--- | :--- |
| Operating Temperature | -40 to $85^{\circ} \mathrm{C}$ |
| Storage Temperature | Designed to meet EN61000-4; -2, $-3,-4,-5,-6,-8,-11$ Level 3 |
| Electromagnetic Susceptibility | Operating; Non-condensing 10 to $95 \% \mathrm{RH}$ |
| Humidity | IEC68-2-6 to the levels of IEC721-3-2 |
| Vibration | $>550,000$ hours at full load, 220 VAC and $25^{\circ} \mathrm{C}$ ambient conditions |
| MTBF Demonstrated |  |

- UL/CSA 61010 and IEC/EN 61010-1
- CB Certificate and Report
- CE (LVD+RoHS), EN60950-1

## Precision High Power System

## Up to 24000 W

## SPECIAL FEATURES

- Multi output precision high power system
- Standard 19" rack
- Outputs parallel up to 1600 A
- Outputs series up to 1000 V
- $100 \%$ digital control
- Outputs program as voltage or current source
- Versatile input configurable to:
- Low Line 180 to 264 VAC Single/3-Phase
- High Line 342 to 528 VAC 3-Phase
- Medical safety approved - No ISOLATION XFMR NEEDED
- Flexible control interfaces: Analog 0 to 5 V or 0 to 10 V ; Digital Ethernet UDP, RS485, CAN, etc. or Ethernet TC/IP with PowerPro Connect Module option. Command protocol standard PMBus
- Air cooled
- Semi F47 compliance
- Field upgradeable firmware
- Programmable slew rate
- Fast current slew rate up to 200 Hz
- Active power factor correction
- User defined command profiles
- Direct drive current source for large scale LED grow luminaries

The PPCM can also provide web based horticultural lighting scheduling control with the Intelligent Horticultural Lighting Control (iHLC) software.

Intelligent Transfer Switch (iTS)
Up to 24000 W

SPECIAL FEATURES

- 5-year manufacturer's warranty
- Modular 8 channel A:B switch
- Standard 19" rack
- Reversable mounting tabs
- Designed for use with iHP and LCM4000 product families
- $100 \%$ digital control
- Intelligent zero current switching when used with Artesyn devices
Total Power
Up to 24 KW
Input Voltage
90 to 264 VAC Nominal Single Phase
\# of Outputs
Up to 8
Safety
- EN62368-1
- UL/CSA62368-1
- IEC62368-1
- Cloud based user configurable GUI
- Natural convection cooled (No Fan)
- Field upgradeable firmware
- Up to 16 racks are addressable from one control Node
- Configurable baud rate
- MTBF 400 K hours per Telecordia SR-332 Method 1 Case 3, Part Stress
- Product lifetime 10 years minimum (Modbus-RTU)
iTS Electrical Specifications - Housekeeping Power Supply Module

| Parameter | Value |
| :--- | :--- |
| AC Input Voltage | 90 to 264 VAC |
| AC Input Frequency | $50 / 60$ Hz Nominal |
| AC Input Fusing | Included for both input AC lines (Not user serviceable) |
| AC Inrush Current | Upon start-up from a "cold start", the maximum AC input <br> current shall not exceed 50 A at 264 VAC 25C |
| Output to Relay Module | 12 V @ 1 A per module; 3V3 as reference voltage $\pm 1 \%$ |

| iTS Electrical Specifications - Relay Module |
| :--- |
| Parameter Value |
| Description |
| The relay is double break, capable for 25 A max continuous operation. Both output lines, positive and return, are switched. <br> To prevent arcing, the relay is only switched when zero voltage / zero current is flowing through the contacts (Provided by <br> master software control of the power source and Relay MCU.) <br> The relay module shall support iHP modules with Nominal voltage rating of 125 VDC, 200 VDC and 250 VDC along with <br> the 250 VAC output of the LCM4000HV. iHP modules connected in series for higher voltage output is allowed, but the <br> load maybe derated so as Not to exceed the switching power rating of the relay |
| \# Inputs |
| One per relay module, up to 8 can be loaded in a single 2U rack |
| Nominal Input Voltage |
| Input Current Max |
| Input Current Fault |

| Ordering Information <br> Model | Configuration |
| :--- | :--- |
| $73-779-008$ | Fully configured, Rack with 8 relay modules |
| $73-779-007$ | Rack with 7 relay modules |
| $73-779-006$ | Rack with 6 relay modules |
| $73-779-005$ | Rack with 5 relay modules |
| $73-779-004$ | Rack with 4 relay modules |
| $73-779-003$ | Rack with 3 relay modules |
| $73-779-002$ | Rack with 2 relay modules |
| $73-779-001$ | Rack with 1 relay module |
| $73-779-000$ | Relay module only |
| $73-779-$ TBD | Blank relay module |

## PowerPro Connect Module (PPCM)

Part number: 73-778-000A (purchased separately)
The PPCM can provide web based horticultural lighting scheduling with the Intelligent Horticultural Lighting Control (iHLC) software. The PPCM connects to a wired ethernet network and to the iTS with MODBUS RTU.
Use with iHP for a for a complete LED solution.

## Total Power

300 W (350 W some models)

## \# of Outputs

Single

Output

## 12 to 60 V

Optional 5.0 V standby

## Safety

## LCM300

## Bulk Front End 300 W

## SPECIAL FEATURES

- 300 W (350 W some models)
- Low cost
- $1.61 \times 4.0 \times 7.0$ in
- $7.1 \mathrm{~W} / \mathrm{in}^{3}$
- Industrial/Medical safety
- -40 to $70^{\circ} \mathrm{C}$ with derating
- Optional 5 V @ 2 A housekeeping
- High efficiency: 91\% @ 230 VAC
- Variable speed "Smart Fans"
- DSP controlled
- PMBus ${ }^{\text {TM }}$ compliant
- Conformal coat option
- $\pm 20 \%$ adjustment range
- Margin programming (300 W and 600 W models)
- OR-ing FET
- EMI Class B
- EN61000 immunity
- RoHS 2

## LCM1000

## Bulk Front End 1000 W

## SPECIAL FEATURES

- 1000 W output power
- Low cost
- $2.5 \times 5.2 \times 10.0 \mathrm{in}$
- $7.7 \mathrm{~W} / \mathrm{in}^{3}$
- Industrial/Medical safety
- -40 to $70^{\circ} \mathrm{C}$ with derating
- Optional 5 V @ 2 A housekeeping
- High efficiency: 90\% typical
- Variable speed "Smart Fans"
- DSP controlled
- Conformal coat option
- $\pm 10 \%$ adjustment range
- Margin programming
- OR-ing FET
- Low acoustic Noise

## Total Power

## 1000 W

## \# of Outputs

Single

Output

## 12 to 48 V

## Optional 5.0 V standby

## Safety

## Total Power

LCM4000HV: 4000 W
LCM12K: 12 kW

## Input Voltage

LCM4000HV: Single Phase
187 to 264 VAC
311 to 528 VAC

## LCM12K: Three Phase

187 to 229 VAC
342 to 528 VAC
540 to 660 VAC (WYE with Neutral)
Output

## LCM4000HV:

Voltage source: 100 to 300 VDC
Current source: 0 to 16 A

## Compliance

- EMI Class A
- EN61000 Immunity
- RoHS 3

## Safety

- UL 62368-1 Listed
- CSA 62368-1 Listed
- EN 62368-1 Listed
- IEC 62368-1 Listed
- CB Certificate and Report (IEC 62368-1/IEC 60950-1)
- CE (LVD+RoHS)

## LCM4000HV/LCM12K

4000 W Bulk Front End/12 kW Power Shelf Centralized Power for LED Horticulture Lighting

## SPECIAL FEATURES

- Wide input voltage range
- High efficiency: up to $95 \%$
- Industrial safety
- Five-year warranty
- Low cost

LCM4000HV:

- 4000 W output power
- $480 \mathrm{~mm} \times 140 \mathrm{~mm} \times 40.3 \mathrm{~mm}$
- 38 W per cubic inch
- Variable speed "Smart Fans"
- Dust control for fan cooling
- DSP controlled
- Digital and analog communication
- Scales easily (Module/Shelf/Rack)
- Meets DLC 2.1 requirements
- Supports Artesyn iTS and IHLC LCM12K:
- Accepts 3 types of input configurations (3-PH delta 4W, 3-PH wye 4W, 3-PH wye 5 W )
- Houses three 4 kW power modules
- $446.3 \mathrm{~mm} \times 504.3 \mathrm{~mm} \times 43.7 \mathrm{~mm}$

Xsolo
Ultra-compact, High-efficiency 500 W and 1000 W Single Output Power Supplies

SPECIAL FEATURES

- Single output voltages are 24 V , 36 V , or 48 V with wide adjustment ranges and user-defined set-points
- Ultra high efficiency, > 92\%
- Low profile: 1 U height ( 40 mm )
- Convection-cooled 500 W
- Fan-cooled 1000 W (variable speed fan)

TYPICAL APPLICATIONS

- Industrial
- Test and measurement
- Acoustically sensitive laboratory and medical environments

24, 36, 48
24, 36, 48
Safety

- IEC60601-1 2nd and 3rd edition
- IEC60601-1-2 4th edition (EMC)
- IEC60950 2nd edition
- 2 MOPP
- SEMI F47 ${ }^{1}$
- MIL-STD-810G ${ }^{2}$

1 SEMI F47 compliant at input voltages > 160 VAC. Consult Advanced Energy for details.
2 Consult Advanced Energy for MIL810G report (enhanced ruggedisation available as an option).

1 Minimum voltage is guaranteed at greater than $1 \%$ of the rated output voltage. Minimum current is guaranteed at greater than $1 \%$ of the rated output current.
2 Measured with 20 MHz bandwidth and excluding line frequency ripple (see application note AN024 for measurement details).
3 Time for output voltage to recover within $0.5 \%$ of its rated output for a load change from 10 to $90 \%$ of its rated output current.
Voltage set point from $10 \%$ to $100 \%$ of rated output.
4 Add this to the output reopens time to obtain the total programming time.
5 Time to provide data back to the controller using LAN interface (does not include A/D conversion time).
6 iLS600-R series come with rear ports.

* Supplemental characteristics are not warranted but are descriptions of typical performance determined either by design or type testing.

1 Rating is percent of full scale. Rating is for operation between $10 \%$ of minimum voltage or current rating to $100 \%$ of voltage rating and the current rating at that voltage. Minimum voltage is guaranteed at greater than $1 \%$ of the rated output voltage. Minimum current is guaranteed at greater than $1 \%$ of the rated output current.
2 Measured with 20 MHz bandwidth and excluding line frequency ripple (see application note AN024 for measurement details)
3 Time for output voltage to recover within $0.5 \%$ of its rated output for a load change from 10 to $90 \%$ of its rated output current.
Voltage set point from $10 \%$ to $100 \%$ of rated output.
4 Add this to the output reopens time to obtain the total programming time.
5 Time to provide data back to the controller using LAN interface (does not include A/D conversion time).
61500 W Output is only available with an AC input of 110 VAC or grater. With a lower AC line, output will be limited to 1100 W .

* Supplemental characteristics are not warranted but are descriptions of typical performance determined either by design or type testing. Specifications subject to change without notice. Contact Versatile Power for full specifications and additional information.

- Available

## SPECIAL FEATURES

- Active power factor correction
- EN61000-3-2 harmonic compliance
- Active AC inrush control
- High density
- Outputs + 12 VDC with some +48 VDC models available
- 3.3 VDC standby
- 12.0 VDC standby on some models
- Options for 5 V standby voltage
- No minimum load required
- Hot plug operation
- N+1 redundant
- Internal OR-ing FETs
- Active current sharing
- Built-in cooling fans
- $I^{2} C$ Interface with EEPROM for FRU data
- Internal fan speed control with fan fail signal
- DC Input
- DSR1 rack for DS650/850.

Ordering part number is 73-762-002. Standard 19" 1 U fits up to 5 modules (4250 W)

- Options for reverse airflow
- Platinum Plus efficiency on some models

50 V, 18 kW, 1OU Open Rack Power Shelf 15 kW N+1

SPECIAL FEATURES

- 15 kW at 50 V with $\mathrm{N}+1$ redundancy or 9 kW at 50 V with $\mathrm{N}+\mathrm{N}$ redundancy (dual feed shelf)
- Highly accurate droop + active current sharing
- Very high efficiency
- Accepts 3 types of input configurations (3P Delta $4 \mathrm{~W}, 3 \mathrm{P}$ Wye $5 \mathrm{~W}, 3 \mathrm{x}$ of 1 P )
- Black box fault recording

Total Output Power
18 kW

Safety

- UL 60950
- IEC 60950
- EN 62368-1
- EN 62368-1
- IEC 62368-1

| Electrical Specifications |  |  |  |

## DIN RAIL

## ADN-C Series Single Phase

## 120 to 960 W

## SPECIALFEATURES

- Slim form factor
- Five year warranty
- High efficiency > 90\% typical
- Full power at $60^{\circ} \mathrm{C}$
- PowerBoost technology
- Industrial grade design
- Metal mounting clip
- Metal case
- MTBF $>450,000 \mathrm{~h}$ demonstrated at $40^{\circ} \mathrm{C}$
- Active PFC > 0.92
- Adjustable output
- Over-voltage protection with auto recovery
- Continuous short-circuit and over-load protection
- SEMI F47 Sag Immunity
- New visual diagnostic LED
- Three Status LEDs - Input, Output, Alarm
- DC OK Relay
- Parallel operation capability
- Screw terminal connections
- RoHS compliant
- No tools required for mounting

## ADN-C Series <br> 3-Phase

## 120 to 960 W

## SPECIAL FEATURES

- Slim form factor
- Five year warranty
- High efficiency > 93\% typical
- Full power at $60^{\circ} \mathrm{C}$
- PowerBoost technology
- Industrial grade design - metal cases
- MTBF $>450,000 \mathrm{~h}$ demonstrated at $40^{\circ} \mathrm{C}$
- Active PFC
- Adjustable output
- Over-voltage protection with auto recovery
- Continuous short-circuit and over-load protection

| Electrical Specificatio Input |  |
| :---: | :---: |
| Nominal Voltage | 380 to 480 VAC |
| AC Input Range | 320 to 540 VAC |
| DC Input Range | 450 to 720 VDC for ADN20 |
| Frequency | 50 to 60 Hz |
| Efficiency | 93\% for ADN20; 94\% for ADN40 |
| PFC | Active power factor correction |
| Two Phase Input | Derate to $75 \%$ and $50 \%$ for ADN20 and ADN40 respectively under loss of 1 phase. Units will shut down if thermal threshold is exceeded under this condition |
| Output |  |
| Nominal Voltage | 24 V (24.0 to 28.0 VDC Adj.) |
| Hold-up Time | > 20 ms for ADN20; > 15 ms for ADN40 |
| Voltage Regulation | < $\pm 2 \%$ overall |
| Ripple | < 100 mVpp |
| PowerBoost | $1.5 \times$ Nominal current for 4 seconds |
| Peak Current | $1.5 \times$ Nominal current for 4 seconds minimum while holding voltage > 20 VDC |
| Parallel Operation | Single or parallel operation selectable via front switch. For redundant operation use of external diode module is preferred; ADN40 uses active paralleling |
| Power Back Immunity | > 35 V |
| Over-voltage Protection | > 30.5 VDC but < 33 VDC , auto recovery |

## 4F

## DC-DC Converters

As an industry leader in distributed power supplies, Advanced Energy provides an exceptionally wide range of DC-DC power conversion solutions

## Distributed Power Architecture

Advanced Energy understands the needs and nuances of developing power systems using distributed power architecture. We know it is your job to create the most efficient, cost-effective, quality system, and deliver it in a timely fashion.

From full-system power to board-level components, high-power isolated front ends to a full line of isolated and non-isolated DC-DC modules, Advanced Energy is the source for today's power systems.

Distributed Power Architecture DC-DC Conversion

AC-DC

## INDUSTRY STANDARD ISOLATED

## Quarter-Brick

## SPECIALFEATURES

- Industry leading quarter-brick standard package and feature sets
- Up to 100 A offering
- Wide operating temperature range
- Meets basic insulation
- PMBus ${ }^{\text {TM }}$ interface
- Exceptional dynamic response and reactive loading capability

- Monotonic start-up characteristic
- International safety standards approvals - UL, CSA, TÜV

## Eighth-Brick

## SPECIAL FEATURES

- Industry leading eighth-brick standard package and feature sets
- Scalable output power offering: Low power 80 W series or up to 300 W high power series
- Mechanical options for optimum mounting flexibility: Open-frame (ALO, LES, AVO) or baseplate (AEO or AVO-B) construction; Through-hole (default) or surface mount (suffix "-S") termination; 5 mm (default) or 3.7 mm throughhole pin length option
- PMBus ${ }^{\top M}$ interface
- Meets basic insulation
- Power densities as high as 181 W per in ${ }^{3}$
- Wide operating temperature range
- International safety standards approvals - UL, CSA, TÜV

## Radio Frequency Power Modules

## SPECIAL FEATURES

- Specialized high power bricks for RF applications such as base station power amplifiers
- Offered in 24 V and 48 V input voltages
- Wide output voltage adjustability
- -40 to $85^{\circ} \mathrm{C}$ for AVE, AGF baseplate temperature with No derating at rated power
- International safety standard approvals UL, CSA, VDE, CB Report

## Wide Input Voltage Series

## SPECIAL FEATURES

- Wide input voltage range to cover 24 V and 48 V input
- Industry standard brick package
- Open-frame and baseplate construction
- Wide operating temperature

## Direct Conversion - Power Stamp Alliance Series

## SPECIAL FEATURES

- 100 A peak current
- PSA compliant
- Up to $93 \%$ efficient
- Low ripple and Noise
- Data center 48 VDC input range
- Open frame optimized for air cooling
- Surface mount termination
- Fixed switching frequency
- High capacitive load capability
- Pre-bias start-up capability
- High reliability
- RoHS 3.0 compliant
- UL94 V-0 materials

## C-Class - High Density

## Non-Isolated DC-DC Converters

The second generation C-class non-isolated DC-DC converters are designed to provide good efficiency and performance, a smaller footprint, and integrated input and output capacitors.

## SPECIAL FEATURES

■ Wide input voltage ranges: 3 to 13.8 V or 4.5 to 13.8 V

- Wide output voltage trim/adjustability: 0.59 to 5.1 V
- Output current: 3 to 40 A
- High efficiency up to $94 \%$
- Remote sense (Sxx20C2, Sxx40C2 and Sxx60C2)
- Operating temperature range for LDO03, LDO06, LDO10: -40 to $85^{\circ} \mathrm{C}$.
- Operating temperature range for SIL/ SMT20C2, SIL/SMT40C2 and SIL60C2: 0 to $70^{\circ} \mathrm{C}$
- Cost-optimized design - industry leading value
- Compact footprint, vertical, horizontal and horizontal SMT options
- International safety standard approvals UL, CSA, TÜV \& CB Report

## LGA Series

Dual Output Non-Isolated Digital DC-DC Converter

LGA80D

LGA110D

## SPECIAL FEATURES

- Two-phase design
- Dual or single output configuration possible
- High efficiency up to $95.5 \%$
- Small size $1^{\prime \prime} \times 0.5^{\prime \prime} \times 0.48^{\prime \prime}$ ( $\mathrm{L} \times \mathrm{W} \times \mathrm{H}$ )
- Support PMBus
- No minimum load requirement
- Wide operating temperature range
- Exceptional power density
- Automatic loop compensation
- Excellent transient response
- Analog or digital control
- IPC9592B compliant

## C-Class - High Density LGA C Series

The latest addition to the c-class non-isolated DC-DC converter offering packaged in an ultra-compact, low-profile land grid array with current densities up to 225 A/in ${ }^{3}$.

LGA03C

LGA06C

LGA10C

LGA20C

## SPECIAL FEATURES

- High density, ultra low profile surface mount module in Land Grid Array (LGA) package
- Available in 4 different output current levels: 3, 6, 10 and 20 A
- Wide input voltage range: 3.0 to 14.0 V
- Adjustable output voltage: 0.59 to 5.1 V via external resistor
- High efficiency ~92\% typical
- Wide ambient operating temperature range: -40 to $85^{\circ} \mathrm{C}$
- Input UVLO; remote On/Off; output adjust; margin; PGood signal, differential sense
- Current sink capability for voltage termination applications
- Integrated input and output capacitors resulting in minimal external capacitance required for stable operation

## INDUSTRY STANDARD NON-ISOLATED

## POLA - General Purpose

## Choose POLA Modules for Multi-sourced and Interoperable Parts

## SPECIAL FEATURES

- Input voltage ranges: 2.95 to 3.65 V , 4.5 to $5.5 \mathrm{~V}, 10.8$ to 13.2 V
- Wide output voltage trim and adjustability: 0.8 to 5.5 V
- Output current: 6 to 60 A
- High efficiency up to $96 \%$
- Auto-Track ${ }^{\text {™ }}$ Sequencing
- Margin up/down controls
- Pre-bias start-up capability
- Remote on/off
- Remote sense
- POLA compatible
- True multi-sourcing flexibility (form, fit and function)
- Operating temperature range: -40 to $85^{\circ} \mathrm{C}$
- Protection: overcurrent/short-circuit
- Through-hole or surface-mount
- International safety standard approvals UL, CSA, TÜV \& CB Report

## Digital DC-DC Converters

## SPECIALFEATURES

- PMBus ${ }^{\text {TM }}$ compliant control and monitoring functions available on all digital DC-DC products
- Popular monitoring functions such as temperature, voltage, and current are all available
- Control functions for enabling and sequencing are all available.

## ISOLATED DC-DC SPECIAL FEATURES

- Isolated DC-DC converters follow the DOSA standard footprints for digital interface bricks

## NON-ISOLATED DC-DC SPECIAL FEATURES

- Non-isolated LGA50D has dual independently controlled channels of up to 25 A per channel
- Non-isolated LGA80D has dual independently controlled channels of up to 40 A per channel
- Provides current density of 160 A per in ${ }^{2}$
- Evaluation kit available

LGA80D-00SADJJ

LGA110D-DEMO-KIT

## On-Board AC-DC Distributed Architecture

- High power and high density AC-DC building blocks for quick-turn and modular power solutions
- Alternative power solutions vs. custom development approach
- No fans and high reliability (1M hours MTBF)
- Suitable for harsh temperature conditions ( $-40^{\circ} \mathrm{C}$ start-up/-20 to $100^{\circ} \mathrm{C}$ operating temperature)
- RTCA-DO Compliant for some AIQ/AIT models

## AIF-Case-Kit

Compatible for use with full AIF PFC full brick modules to assist with radiated EMI emissions in sensitive applications.

# Power Factor Correction <br> (PFC) 

 75 W

## SPECIAL FEATURES

- IEC 1000-3.2 compliance
- On/off enable
- $100^{\circ} \mathrm{C}$ baseplate
- Clock synch (in/out)
- Current monitoring
- Vout adjust
- Remote sense
- 95\% efficiency
- Fast transient response
- $1600 \mathrm{~W} / 720 \mathrm{~W} / 75 \mathrm{~W}$
- Unity power factor
- Universal input and frequency range
- Positive and negative enable
- Paralleling with current share

$185^{\circ} \mathrm{C}$ temperature

## High Power 300 Vin

## SPECIAL FEATURES

- 300 V input ( 250 to 420 V PFC-ready)
- 2nd generation product
- Standard through-hole termination
- Power density > $100 \mathrm{~W} / \mathrm{in}^{3}$
- $100^{\circ} \mathrm{C}$ max baseplate operating temperature
- Embedded controls on secondary side (Full- and Half-brick):
- Temp monitor
- Current sharing
- Power good signal
- Current limit \& OVP adjust

## LOW POWER ISOLATED DC-DC PRODUCT

## Low Power Isolated DC-DC Product

## SPECIAL FEATURES

- Input voltages 9 to $36 \mathrm{~V}, 18$ to 36 V , 18 to 75 V and 36 to 75 V
- Single and dual outputs
- Power 2 to 50 W
- Regulated outputs
- Over-current protection
- Operating temperature -40 to $71^{\circ} \mathrm{C}$ (ambient)
- 1500 VDC isolation
- CE Mark Safety
- UL Approval (Except AET Series)

## DC-DC Converter for Medical Applications

## SPECIALFEATURES

- Medical Safety to UL / CSA / IEC / EN 60601-1 3rd Edition
- 4200 VAC reinforced insulation
- 2 MOOP rated
- Low leakage current
- Operating Temperature Range -40 to $+85^{\circ} \mathrm{C}$ (with derating)
- Input filter meet EN 55022, Class A and FCC, Level A
- 3-year product warranty

# Mission-Critical High Voltage Solutions for Demanding Applications 

## STANDARD, CONFIGURABLE MODULES

- Exceptionally wide input and output operating ranges

BENEFITS

- Products to 250 W , paralleled to 1000 W
- Proven solutions, higher reliability
- Lower initial cost
- Advanced arc handling
- Excellent power quality
- RoHS compliance
- Shorter lead times, faster integration
- Easy interfacing: digital ready

| Series | Power (W) | Input Voltage | Output Voltage | $\begin{aligned} & \text { Package } \mathrm{L} \times \mathrm{W} \times \mathrm{H} \\ & (\mathrm{~mm}) \end{aligned}$ | I/O Isolation | Model Number (Examples) | Special Features |
| FIL Series | 15 | 24 V | 5 V | $119.4 \times 38.1 \times 22.9$ | No | FIL-5V-3A | Units feature surface-mount technology and encapsulation techniques <br> - Maximum output current capability down to 0 volts <br> - Capable of providing 0 to 5 VDC and 0 to 3 A <br> - Current and voltage mode indicators <br> - Units are available with several options |
| EFL Series | 12,24, or 36 | 12 V or 24 V | 12 V or 24 V | 15EFL Series: $144.8 \times 38.1 \times 33$ 30EFL Series: $177.6 \times 41.3 \times 38.1$ | Yes | $\begin{aligned} & \text { 15EFL12-12W- } \\ & \text { I/O-RB } \\ & \text { 30EFL24-36W- } \\ & \text { I/O-RB } \end{aligned}$ | - Precision analog control <br> Linearity of $\pm 0.05 \%$ and accuracy of $\pm 0.2 \%$ <br> 10ppm temperature coefficient <br> Isolated up to 15 kV or 30 kV <br> Isolation resistance of 150 GQ ( 15 kV ) or 2 Gת (30 kV) <br> 4 regulated floating LV power outputs Isolated digital and analog I/O to and from floating hot deck |
| FL Series | 12 or 24 | 12 V or 24 V | 12 V or 24 V | $144.8 \times 38.1 \times 29.8$ | Yes | 15FL12-12W | - Isolated up to 15 kV <br> - DC leakage current of <10 nA <br> - AC leakage capacitance of $<40 \mathrm{pF}$ <br> - 3 regulated floating LV power outputs <br> - Isolated digital I/O to and from floating hot deck <br> - Isolated analog I/O to and from floating hot deck <br> - UL/CUL Recognized Component; CE Mark (LVD \& RoHS) |
| High Power C Series | 60, 125, 250 | 24 V | 125 V to 60 kV | $\begin{aligned} & 1 / 8 \mathrm{C} \text { to } 6 \mathrm{C} 60 \& 125 \mathrm{~W} \text { : } \\ & 114.3 \times 101.6 \times 27 \\ & 1 / 8 \mathrm{C} \text { to } 6 \mathrm{C} 250 \mathrm{~W}: \\ & 203.2 \times 114.3 \times 27 \\ & 8 \mathrm{C} \text { to } 30 \mathrm{C} 60 \& 125 \mathrm{~W} \text { : } \\ & 203.2 \times 114.3 \times 27 \\ & 8 \mathrm{C} \text { to } 30 \mathrm{C} 250 \mathrm{~W}: \\ & 235 \times 114.3 \times 51.6 \\ & 40 \mathrm{C} \text { to } 60 \mathrm{C}: \\ & 355.6 \times 114.3 \times 63.5 \end{aligned}$ | No | 1/8C24-N125 6C24-P250 8C24-P60 30C24-N125 50C24-P250 | Fast-rise charging power delivered from an optimized design <br> Limited overshoot, typically less than 1\% of high voltage setpoint, depending on the application <br> High power-to-package size ratio <br> Full-featured analog interface includes voltage/current controls and monitors <br> - Selection of electrical and mechanical integration options |
| HVA | 1, 1.5, or 2 | 24 V | 1 kV to 20 kV | Small: $152.4 \times 96.8 \times 31.8$ Large: $247.7 \times 165.1 \times 38.1$ | No | $\begin{aligned} & \text { 1HVA24-P1 } \\ & \text { 20HVA24-BP1 } \end{aligned}$ | - Full-range two- and four-quadrant output of voltage and current for bias, amplification or reversing <br> - Fast voltage slew rates and broad bandwidths up to 500 Hz <br> - Sources and sinks output current through operating range <br> High voltage output controlled using differential analog inputs <br> - Compact size with electrical performance and mechanical integration options |
| LE Series | 4, 15 (10 and 30 only), 20 (1 to 6 only), 30 | 24 V | 1 kV to 30 kV | $\begin{aligned} & 1-15 \mathrm{kV}: \\ & 152.4 \times 96.77 \times 38.15 \\ & 20-30 \mathrm{kV}: \\ & 184.91 \times 100 \times 38.16 \end{aligned}$ | No | $\begin{aligned} & \hline \text { 1LE24-P4 } \\ & \text { 30LE24-N30 } \end{aligned}$ | Low ripple output performance <br> Available temperature coefficient to $25 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ (optional $10 \mathrm{ppm} /{ }^{\circ} \mathrm{C} 1 \mathrm{LE}$ to 15LE only) with line regulation less than 25 ppm <br> High voltage output control via differential analog inputs <br> Full-featured 0 to 10 VDC control; interface includes voltage/current controls and monitors <br> Electrical performance and mechanical integration options |

| Mission-Critical High Voltage Solutions for Demanding Applications |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Series | Power (W) | Input Voltage | Output Voltage | $\begin{aligned} & \text { Package } \mathrm{L} \times \mathrm{W} \times \mathrm{H} \\ & (\mathrm{~mm}) \end{aligned}$ | I/O Isolation | Model Number (Examples) | Special Features |
| D Series | 1, 2, 4, or 6 | 15 V or 24 V | 1 kV to 6 kV | $\begin{array}{\|l} 1 \text { to } 4 \mathrm{kV} \text {, up to } 4 \mathrm{~W}: \\ 63.5 \times 44 \times 13 \\ 1 \text { to } 6 \mathrm{kV}, 6 \mathrm{~W}: \\ 63.5 \times 44 \times 17.5 \end{array}$ | No | $\begin{aligned} & \text { 1D15-N1 } \\ & \text { 6D24-P6 } \end{aligned}$ | ■ Small-footprint, PCB-mountable package <br> High voltage control and monitoring accuracy better than 0.2\% <br> - Analog interface with integral voltage control and voltage/current monitors <br> - Over-temperature protection disables output if module case $>75^{\circ} \mathrm{C}$ <br> - Reversed polarity, short-circuit/arc, and over-current protection |
| M Series | 0.5, 0.8, or 1 | $\begin{aligned} & 600 \mathrm{~V} \text { to } 1.5 \mathrm{kV}: \\ & 12,15 \text {, or } 24 \\ & 2 \mathrm{kV} \text { to } 3 \mathrm{kV} \text { : } \\ & 5,15, \text { or } 24 \end{aligned}$ | 600 V to 3 kV | $47 \times 28 \times 12.5$ | No | $\begin{aligned} & \text { 0.6M0.5-P0.5 } \\ & \text { 3M24-N1 } \end{aligned}$ | Low profile, lightweight, PCB-mountable package <br> Wide selection of input and output voltage configurations <br> Low output ripple, temperature coefficient, and line regulation (Analog interface with integral voltage control and voltage/current monitors <br> Integrated reverse input polarity, shortcircuit/arc, and over-current protection |
| MPM Series | 1.5 W | 12 or 24 | 100 V to 3 kV | $38.1 \times 38.1 \times 20.1$ | No | MPM12-100N MPM24-3KP | Single pin provides both module power and control of high voltage output <br> - Compact, low-profile, PCB-mountable package <br> - Selection of high voltage outputs: 100 to 3000 VDC, positive or negative polarity <br> Input polarity protection; output protection from intermittent open- or short-circuits <br> - Available input/output isolation to 100 VDC, metal shielding options |
| US Series | 100 mW | 5,12 | 200 V to 500 V | $25.5 \times 20.5 \times 11$ | No | 0.5US5-P0.1 | - Small, lightweight, PCB-mountable package ( $5.8 \mathrm{~cm}^{3}, 13 \mathrm{~g}$ ) <br> Low output ripple, temperature coefficient, and line regulation (Analog interface with output voltage control and monitoring) <br> Integrated over-current and short circuit/ arc protection <br> Tin-plated metal enclosure |
| $\checkmark$ Series | 0.5, 0.8, or 1 | $\begin{aligned} & 600 \mathrm{~V} \text { to } 1.5 \mathrm{kV}: \\ & 12,15 \text {, or } 24 \\ & 2 \mathrm{kV} \text { to } 3 \mathrm{kV}: \\ & 5,15, \text { or } 24 \end{aligned}$ | 600 V to 3 kV | $46 \times 12 \times 24.6$ | No | $\begin{aligned} & \hline 0.6 \mathrm{~V} 0.5-\mathrm{P} 0.5 \\ & \text { 3V24-N1 } \end{aligned}$ | - Small-footprint, lightweight, PCBmountable package <br> - Wide selection of input and output voltage configurations <br> - Low output ripple, temperature coefficient, and line regulation (Analog interface with integral voltage control and voltage/current monitors) <br> Integrated reverse polarity, short-circuit/ arc, and overcurrent protection |
| XS Series | 100 mW | 5 | 100 V | $11 \times 11 \times 10.7$ | No |  | - Small, lightweight, PCB-mountable package ( $1.3 \mathrm{~cm}^{3} ; 5 \mathrm{~g}$ ) <br> Output ripple < 100 ppm, with temperature coefficient < $50 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ <br> - Analog interface w/ output volt. control <br> - Integrated overcurrent protection <br> - Tin-plated metal enclosure |
| HV Rack ${ }^{\circledR}$ Series | 1 to 4 channels, 250 W per channel, total maximum 1000 W | 230 VAC | 62 V to 40 kV | $482.6 \times 470 \times 133.35$ | No | Custom | - Up to four configurable high-voltage outputs <br> - Ideal for various beam applications <br> - Cand provide floating filament 0 to $5 \mathrm{VDC} / 0$ to 3 A when used with the FIL5V-3A <br> - Current mode and voltage mode indicator <br> - Several options and unites |

## Rapid Modification and Value-Added Solutions

> Time-to-market, reliability and costs have the greatest impact on your ROI. Fully custom solutions can delay your time-to-market and undermine your competitive advantage. Avoid paying custom development costs with an Advanced Energy modified standard power supply.

While Advanced Energy's Artesyn, Excelsys and UltraVolt product lines offer a broad range of standard products that address the needs of many industries, there are occasions when a standard product does not address all your application requirements. A custom solution may not be economical or meet scheduling needs. By using proven standard platforms as building blocks, Advanced Energy can develop cost-effective turnkey power solutions that meet your exact needs.

## Modified Advantage

What you will get from Advanced Energy modified power supplies:

- Broad portfolio of power supplies to leverage from
- Quick time to market vs. custom solutions
- Low risk - using proven reliable platforms as building blocks
- Cost effective (lower development cost)
- Quality, high reliability products

## Modified Solutions

Advanced Energy provides modified standard products and value-add solutions in varying degrees of complexity. These meet specific customer needs in a wide range of applications, such as:

Communications

- Access solutions
- Enterprise
networking
- Wireless
- Wireline
- Optical

Healthcare

- Bio life sciences
- Dental
- Imaging
- Laboratory
- Medical

Industrial

- Process control
- Robotics
- Test \& measurement

Lighting \& Signage

- Displays
- Illuminated signs

Aero<br>- Avionics<br>- In-flight entertainment

## Capabilities

The exact specifications you require within your budget and reliability standards.

$马$<br>\section*{Electrical Parameters}<br>- Factory out preset<br>- Low noise<br>- Power \& efficiency upgrades<br>- Hot swap control<br>- Inrush current control<br>- Integrated PDU assemblies<br>- Compliance to industry standards

## Connectivity

- Cable wire assemblies
- Connector changes
- Busbar design
- Overmolding
- Interposer boards

## Packaging

- Conformal coating
- Custom chassis/sled
- Ruggedization for shock, vibration, and hazardous locations
- Shielding for high magnetic environment
- Sealed/IP rated enclosures
- Customized print/marking/labels

## Communications \& Control

- Logic signal/timing changes
- Adaptive fan control
- Output sequencing
- Peak load/efficiency optimization

## ABOUT ADVANCED ENERGY

Advanced Energy (AE) has devoted more than three decades to perfecting power for its global customers. We design and manufacture highly engineered, precision power conversion, measurement and control solutions for mission-critical applications and processes.

Our products enable customer innovation in complex applications for a wide range of industries including semiconductor equipment, industrial, manufacturing, telecommunications, data center computing, and medical. With deep applications know-how and responsive service and support across the globe, we build collaborative partnerships to meet rapid technological developments, propel growth for our customers, and innovate the future of power.

[^0]:    1 Peak load current not to exceed 30 seconds with maximum $10 \%$ duty cycle
    2 Requires at least 300 LFM of airflow

[^1]:    1 Peak load current Not to exceed 10 seconds, $\mathrm{T}_{\mathrm{a}}=50^{\circ} \mathrm{C}$.
    2 Requires at least 400 LFM of airflow.
    3 At $25^{\circ} \mathrm{C}$ including factory setpoint, line voltage and load current variations.
    4 Peak-to-peak ripple measured at the output terminal with 20 MHz bandwidth and $10 \mu \mathrm{~F}$ (tantalum capacitor) in parallel with $0.1 \mu \mathrm{~F}$ capacitor across the output.
    5 Optional suffix "-ME" (end-fan) and "-MF": (open-frame) available on the 12 V output.
    680 PLUS certified
    Consult the Technical Reference Notes for complete specifications

[^2]:    *Change suffix "-9P" to "-4P" for IP65 rated enclosure with fly lead wires
    "Change suffix "-4P" to "-4PV" to omit the control cable)
    *Add suffix "CC" for Constant Current setting (e.g. "-4PCC"; "-9PCC")

[^3]:    1 Full dynamic specifications may Not be met at full load when output voltage is trimmed above 13 V
    2 Max Trim 14 V when used with High Power Module
    3 Max Trim 56 V when used with High Power Module
    4 a) Only one High Power module (CmE or CmF) can be used per CoolPac
     for details or support.
    5 For the CmG module the max combined power of both outputs is 120 W
    6 For the CmH module the max combined power of both outputs is 100 W
    7 When a CmK module is used in the same pack as a CmE or CmF module, one module slot must remain unpopulated.

[^4]:    Options
    1 Interchangeable AC plug - must be purchased separately
    $2.1 \times 5.5 \mathrm{~mm}$ barrel plug
    $3 \mu$ USB connector

[^5]:    1 For option codes, see Data Sheet

[^6]:    1 Minimum Current is (0)

[^7]:    1 Detailed input specifications please refer to ordering information section.

[^8]:    1 Consult Advanced Energy for MIL810G report (enhanced ruggedization available as an option)

[^9]:    1 Consult factory for other output voltages and options
    2 Comes with optional $\mathrm{I}^{2} \mathrm{C}$ interface
    33000 W @ 180 to 264 VAC; 1500 W @ 90 to 140 VAC
    42000 W@48V; 1300 W @ 24 V

[^10]:    1 Low line derating will apply

[^11]:    1 Max Current Step: $10 \%$ to $60 \%$, $50 \%$ to $10 \%$
    2 Dynamic Load: 50 Hz / $50 \%$ Duty
    3 Slew Rate: 1A/uS

[^12]:    1 Max Current Step: $10 \%$ to $60 \%, 50 \%$ to $100 \%$
    2 Dynamic Load: @ 00 Hz to 10 kHz
    3 Slew Rate:1A/uSEC

[^13]:    1 Optional heatsink kits are available. Ordering part number is LGA-HTSK-KIT-XXX
    $X X X=$ Total height of the LGA20C-01SADJJ with heatsink attached: $045=0.45^{\prime \prime} ; 048=0.48^{\prime \prime} ; 050=0.50 "$

[^14]:    1 Mounting Option Suffix:
    D Horizontal through-hole (RoHS 6/6)
    Z Surface-mount solder ball (RoHS 6/6)

[^15]:    $185^{\circ} \mathrm{C}$ temperature
